

Windtree to Present at the Oppenheimer Fall Healthcare Life Sciences and MedTech Summit

September 16, 2021

WARRINGTON, Pa., Sept. 16, 2021 (GLOBE NEWSWIRE) -- Windtree Therapeutics, Inc. (NasdaqCM: WINT), a biotechnology and medical device company focused on advancing multiple late-stage interventions for acute cardiovascular and pulmonary disorders, today announced that Craig Fraser, President and Chief Executive Officer, will present a corporate overview and be available for 1x1 meetings at the Oppenheimer Fall Healthcare Life Sciences and MedTech Summit.

The Company's presentation will take place on Wednesday, September 22, 2021 at 9:55 am ET. A live webcast and replay of the presentation will be available on the Investor Events page (<https://ir.windtreetx.com/events>) of the company's website (www.windtreetx.com).

About Windtree Therapeutics

Windtree Therapeutics, Inc. is advancing multiple late-stage interventions for acute cardiovascular and acute pulmonary disorders to treat patients in moments of crisis. Using new scientific and clinical approaches, Windtree is developing a multi-asset franchise anchored around compounds with an ability to activate SERCA2a, with lead candidate, istaroxime, being developed as a first-in-class treatment for acute heart failure and for early cardiogenic shock. Windtree's heart failure platform includes follow-on oral pre-clinical SERCA2a activator assets as well. In pulmonary care, Windtree has focused on developing AEROSURF®, a drug-device combination, to deliver its synthetic KL4 surfactant non-invasively to premature infants with respiratory distress syndrome, and is facilitating transfer of clinical development of AEROSURF® to its licensee in Asia, Lee's HK. Windtree is also evaluating KL4 surfactant for the treatment of acute respiratory distress syndrome in COVID-19 patients. Also in Windtree's portfolio is rostafuroxin, a novel precision drug product targeting hypertensive patients with certain genetic profiles.
