Lee's ability to exercise the Series A-1 warrants is initially restricted (which restriction may be adjusted on 61 days' notice to us) to the extent that, upon exercise, the number of shares then beneficially owned by Lee's and its affiliates and any other person or entities with which Lee's would constitute a group under §13(d) of the Exchange Act would exceed 9.99% of the total number of shares then outstanding (the "**Ownership Cap**"); as a result of the Ownership Cap, Lee's is currently unable to exercise its Series A-1 Warrants; (ii) on December 21, 2018, LPH II, a wholly-owned subsidiary of Lee's, converted \$6.0 million of existing debt obligations in the private placement financing dated December 21, 2018 ("**December 2018 Private Placement**") on the same terms as other investors and received 1,810,938 shares of Common Stock, 307,859 Series F Warrants to purchase 307,859 shares of Common Stock at an exercise price per share of \$3.68, and 597,610 Series G Warrants to purchase 597,610 shares of Common Stock at an exercise price per share of \$4.05. Of this amount, 984,000 shares are held in escrow with our transfer agent for a one-year period to secure the performance of Lee's under an indemnification letter agreement indemnifying the holders of our Common Stock as of December 20, 2018 for losses incurred by us in connection with any material inaccuracy in any representation or warranty made by CVie in the merger agreement to which CVie is a party (notwithstanding any lack of survival after closing of the representations and warranties made by CVie therein). REVERSE SPLIT

With the exception of anticipated post-split share numbers and stock prices set forth in this discussion, unless otherwise indicated, the share numbers do not reflect the effect of any reverse split or change in Authorized Shares of Common Stock

General

Each of the Board and the Majority Holders determined that, for purposes of complying with applicable initial Nasdaq listing rules, it is advisable and in our best interest and that of our stockholders to provide our Board the ability to take advantage of market conditions and other factors and restructure our capital at any time without the delay and additional expense required to secure stockholder approval, which would include mailing an Information Statement or Proxy Statement. Accordingly, the Written Consent approves a Reverse Split of our Common Stock, at a ratio ("**Exchange Ratio**") of not less than 10-for-11 and not greater than 1-for-3, as shall be determined in the sole discretion of the Board, and on the terms described in this Information Statement.

If the Board ultimately decides to implement a Reverse Split, the number of shares of Common Stock authorized for issuance under our Certificate of Incorporation ("**Authorized Shares**"), which is currently 120 million shares, will not be affected and will remain unchanged at 120 million shares following the Reverse Split.

The number of authorized shares of our preferred stock, which is 5 million, will not be affected by a Reverse Split. The par value of our Common Stock will remain unchanged at \$0.001 per share.

The Reverse Split will be implemented simultaneously for all shares of Common Stock that are issued and outstanding, all Treasury shares and all shares issuable under outstanding options and warrants. The Reverse Split will affect all stockholders uniformly and will have no effect on the proportionate holdings of any individual stockholder, with the exception of adjustments related to the treatment of fractional shares (see below).

Why Implement a Reverse Split?

Executing a Reverse Split could be a critical component of our strategy to reapply for and be approved for listing our Common Stock on the Nasdaq Stock Market. In order to meet the listing requirements of the Nasdaq Capital Market, our Common Stock must meet certain minimum trading price requirements. Approving the Reverse Split will provide our Board of Directors with the ability (but not the obligation) to implement a Reverse Split, which will put us in a position to apply for listing our Common Stock on the Nasdaq Capital Market. Without the ability to implement the Reverse Split, we may not meet Nasdaq's minimum price requirement at the time of our planned listing application.

In addition to Nasdaq's minimum price requirement, the Board will determine when to implement a Reverse Split and at what Exchange Ratio based upon a number of other market and business factors deemed relevant by the Board at that time, including, but not limited to:

- the Nasdaq Listing Rules, including the minimum bid price, the minimum number of round-lot holders, and the minimum number of publicly held shares;
- the historical and current trading price and volumes of our Common Stock;
- existing marketability and liquidity of our Common Stock and the expected impact of a Reverse Split on the trading market, including the anticipated post-split market price, for our Common Stock;
- potential business and strategic alternatives, if any, that may be available to us at that time; and
- prevailing general stock market and economic conditions.

Should the Board determine to implement a Reverse Split, before we file the Certificate of Amendment to our Certificate of Incorporation with the Secretary of State of the State of Delaware, we plan to issue a press release announcing the terms, including the Exchange Ratio, and effective date of the Reverse Split.

Potential Benefits of a Reverse Split

There are two primary benefits to implementing a Reverse Split: (i) once the Exchange Ratio is applied to reduce the number of our issued and outstanding shares and shares reserved for issuance under outstanding options and warrants, because our Authorized Shares will remain at 120 million shares, we will have more unreserved shares available for issuance going forward, and (ii) the trading price per share of our Common Stock should increase, which would better position us to meet the minimum bid price required for listing our Common Stock on the Nasdaq Capital Market.

Increase in Shares Available for Future Issuance

If our Board determines to implement a Reverse Split, the number of shares of our Common Stock that are issued and outstanding would immediately and automatically be reduced, as of the effective date of the Reverse Split, by a factor equal to the Exchange Ratio and the number of shares of our Common Stock reserved for issuance under outstanding options and warrants would be reduced proportionately and the respective exercise prices would be increased proportionately; consequently, without increasing the number of Authorized Shares under our Certificate of Incorporation, the number of shares of Common Stock that are available for future issuance would be increased. For example, on June 20, 2019, there were 32,188,855 shares of our Common Stock issued and outstanding and 15,775,297 shares reserved for issuance under stock options, restricted stock units, and warrants. If the Exchange Ratio selected by the Board is "1 for 2," every two shares of Common Stock held by a stockholder would be converted into one share that would remain issued and outstanding. As a result, after such a Reverse Split, there would be 16,094,427 shares of our Common Stock issued and outstanding and 7,887,648 shares reserved for future issuance, leaving 96,017,925 unreserved shares available for future transactions.

The following table presents examples, as of June 20, 2019, relating to the impact of the Reverse Split on our Common Stock based on certain of the Exchange Ratios available for selection by our Board, without giving effect to any adjustments for fractional shares of Common Stock. The number of Authorized Shares will remain unchanged at 120 million.

Exchange Ratio	Number of Shares of Common Stock Issued and Outstanding (1)	Number of Shares of Common Stock Reserved for Future Issuance	Number of Shares of Common Stock Authorized and Available for Issuance
Pre- Split	32,188,855	15,775,297	72,035,848
10-for-11	29,262,595	14,341,179	76,396,226
1-for-2	16,094,427	7,887,648	96,017,925
1-for-3	10,729,618	5,258,432	104,011,950

(1) As of June 20, 2019 and does not take into account the cancellation of any fractional shares, with respect to which holders would be entitled to a cash payment. See, "Treatment of Fractional Shares."

Higher Share Price

If the Board effects the Reverse Split, our stock price per share will increase, at least initially, in relation to the Exchange Ratio, which would better position us to meet the minimum bid price requirement for listing our Common Stock on the Nasdaq Capital Market. Generally, our Common Stock must have a minimum bid price of \$4.00 to qualify for listing on the Nasdaq Capital Market. Although our Common Stock was quoted on the OTCQB on June 10, 2019 at \$4.50, which is more than \$4.00 per share, the market price of our Common Stock is volatile and subject to factors outside of our control. By approving a Reverse Split in advance, our Board can assess the situation at the time of filing the Nasdaq listing application and determine whether implementing a Reverse Split would be advisable to increase the market price of our Common Stock and increase the likelihood that it would remain above the \$4.00 minimum bid price during the application process. The Board also could determine that a Reverse Split is not necessary and proceed accordingly.

INFORMATION ABOUT THE REVERSE SPLIT WHAT YOU NEED TO KNOW

Effect of the Reverse Split on our outstanding shares of Common Stock

If the Board determines to implement a Reverse Split, the Reverse Split will be effective immediately and without further action by our stockholders upon our filing a Certificate of Amendment to our Certificate of Incorporation with the Secretary of State of the State of Delaware. Individual stockholders will own fewer shares after the Reverse Split, equal to the number of shares owned prior to the Reverse Split divided by the Exchange Ratio selected by the Board, and cash in lieu of any resulting fractional share. The Reverse Split will not change the number of stockholders of record, although it may increase the number of stockholders holding odd-lot positions in our Common Stock. Following the Reverse Split, all shares will remain fully paid and non-assessable.

Effect of the Reverse Split on our authorized capital stock

Our authorized capital stock consists of 120 million shares of Common Stock and 5 million shares of Preferred Stock. If the Board implements a Reverse Split, the number of Authorized Shares of Common Stock will not be affected and will remain unchanged at 120 million shares, which will have the effect of further increasing the number of shares available for issuance under our Certificate of Incorporation relative to the number of shares outstanding post-split. The number of shares of authorized Preferred Stock would not change.

If the Board implements a Reverse Split, the par value of our Common Stock will remain unchanged post-split at \$0.001 per share. The value of our Common Stock as designated on our consolidated balance sheet will be decreased proportionately based on the Exchange Ratio with a corresponding increase in additional paid-in capital. "Net loss per common share" will increase proportionately as a result of the Reverse Split since there will be fewer shares outstanding. In future financial statements, "net loss per common share" for periods ending before the Reverse Split will be recast to give retroactive effect to the Reverse Split. We do not anticipate any other material accounting consequence will arise as a result of the Reverse Split.

Treatment of fractional shares

If the Board implements a Reverse Split, no fractional shares will be issued. Stockholders who otherwise would be entitled to receive a fractional share of Common Stock because they hold a number of shares not evenly divisible by the Exchange Ratio selected by the Board will be entitled to receive cash in an amount equal to the product obtained by multiplying (i) the closing price of our Common Stock on the business day immediately preceding the effective date of the Reverse Split as reported on the OTCQB by (ii) the number of shares of our Common Stock held by the stockholder that would otherwise have been exchanged for the fractional share interest. No interest will be paid on any cash amount representing fractional shares between the effective date of the Reverse Split and the date of payment.

Effect of the Reverse Split on options, restricted stock awards and warrants

If the Board implements a Reverse Split, the number of shares of Common Stock subject to outstanding options and restricted stock awards under our 2011 Long-Term Incentive Plan and the number of warrant shares will automatically be reduced by a factor equal to the Exchange Ratio applied for the Reverse Split. The per-share exercise price of options and warrants will also be increased by the same factor, so that the aggregate dollar amount payable for the purchase of shares of Common Stock subject to options and warrants will remain unchanged. For example, if an option holder has options to purchase 1,000 shares at an exercise price of \$1.00 per share, if the Reverse Split is effected at the Exchange Ratio of 1-for-2, the number of shares that may be purchased pursuant to the option will be reduced to 500 shares and the exercise price at which the shares may be purchased will be proportionately increased to \$2.00 per share. In connection with the Reverse Split, the number of shares of Common Stock issuable upon exercise or conversion of outstanding stock options, restricted stock awards and warrants will be rounded to the nearest whole share and no cash payment will be made in respect of such rounding. In addition, under our 2011 Long-Term Incentive Plan, the Reverse Split will reduce the number of shares of Common Stock available for future issuance in proportion to the Exchange Ratio applied for the Reverse Split.

Warrants issued in connection with our financing activities will generally be adjusted as described in the foregoing paragraph, subject to such other adjustments as may be provided in the applicable warrant agreements.

No going private transaction

If the Board implements a Reverse Split, notwithstanding the decrease in the number of outstanding shares of Common Stock resulting from the Reverse Split, the Board does not intend that the Reverse Split would be the first step in a series of plans or proposals of a "going private transaction" within the meaning of Rule 13e-3 of the Exchange Act.

Registration and trading of our Common Stock

Our Common Stock is currently registered under Section 12(g) of the Exchange Act, and we are subject to periodic reporting and other requirements of the Exchange Act. If the Board determines to implement a Reverse Split, the Reverse Split will not affect the registration of our Common Stock under the Exchange Act or our obligation to publicly file financial and other information with the SEC. If a Reverse Split is implemented, our Common Stock will begin trading on a post-split basis on the effective date that we announce by press release. On the effective date, our trading symbol as quoted on the OTCQB will change to "WINTD." The "D" will be removed 20 business days from that date, and the symbol will revert to the original symbol of "WINT." In connection with a Reverse Split, the Company's CUSIP number (which is an identifier used by participants in the securities industry to identify our Common Stock) will change to a number that will be announced in a press release at the time of implementation.

Procedures to Implement a Reverse Split

If implemented, the Reverse Split will be effective on the date set forth in the Certificate of Amendment to the Certificate of Incorporation effecting the Reverse Split as filed with the Secretary of State of the State of Delaware (the effective date) unless otherwise specified in such Certificate of Amendment Certificate of Incorporation, without any action on the part of our stockholders and without regard to the date that any stock certificates representing the stock prior to the Reverse Split are physically surrendered for new stock certificates.

Exchange of book-entry shares

If the Board implements a Reverse Split, stockholders whose shares are uncertificated and held in "street name" with a broker, either as direct or beneficial owners, will have their holdings electronically adjusted by their brokers to give effect to the Reverse Split. In addition, stockholders whose shares are held in book-entry form on the books of our transfer agent, Continental Stock Transfer & Trust Company ("**Continental**"), will have their holdings electronically adjusted by Continental to give effect to the Reverse Split. Continental will issue new statements of holdings following such adjustments. Any payments in lieu of fractional shares will also be processed by the brokers and by Continental as applicable.

Exchange of shares held in certificate form

IF A REVERSE SPLIT IS IMPLEMENTED, STOCKHOLDERS SHOULD NOT DESTROY ANY STOCK CERTIFICATES AND SHOULD NOT SUBMIT THEIR STOCK CERTIFICATES UNTIL THEY RECEIVE A TRANSMITTAL FORM FROM OUR TRANSFER AGENT.

As soon as practicable after the effective date, Continental, acting as exchange agent, will mail to each stockholder of record whose shares are held in certificate form transmittal forms to be used in forwarding their certificates for surrender and exchange for the whole number of new shares of our Common Stock that such stockholder is entitled to receive as a result of the Reverse Split. For ease of stockholder record-keeping, we ask that Certificate of Amendment provide instructions for the exchange of those certificates into book-entry shares in lieu of certificates. The book-entry shares would be held in a separate account on the books of Continental for the benefit of each stockholder. Each stockholder who surrenders certificates will receive a book-entry account statement reflecting the shares of our Common Stock to which such stockholder is entitled as a result of the Reverse Split, or in lieu thereof, such stockholder may elect to receive new certificates representing the shares of our Common Stock to which he or she is entitled as a result of the Reverse Split. No book-entry shares or new certificates will be issued to a stockholder until the stockholder has surrendered his or her outstanding certificate(s) together with the properly completed and executed transmittal form. Stockholders of record will receive a check from Continental representing the cash amount due upon surrender to the exchange agent of the certificates representing any fractional shares.

THE SHARE ISSUANCE PROPOSAL

Each of the Board and the Majority Holders determined that it is advisable and in our best interest and that of our stockholders to approve, in advance and for purposes of complying with applicable Nasdaq listing rules, the issuance of securities in one or more transactions to the extent that those securities exceed 20% of the issued and outstanding Common Stock.

Although our Common Stock currently is quoted on the OTCQB and not on the Nasdaq Stock Market, we plan to apply to list our Common Stock on the Nasdaq Capital Market. In the event that a future issuance is subject to Nasdaq Listing Rule 5635 (Nasdaq's stockholder approval rule), to provide our Board flexibility to identify and complete a financing transaction that otherwise would require stockholder approval, the Majority Holders have consented to the issuance of securities in a transaction that exceeds 20% of the number of shares of our Common Stock or the voting power outstanding before the transaction. The Company currently has 32,188,855 shares of Common Stock issued and outstanding.
